major capital improvement program like this, but these are necessary investments in updating the city's critical infrastructure and we are committed to carefully scrutinizing costs and spending ratepayers' money wisely."

ELECTED LEADERS ANNOUNCE JOINT LETTER TO KEEP NOAA IN SEATTLE *Decision to move costs taxpayers millions*

SEATTLE - Mayor Mike McGinn joined with Congressman Jim McDermott, City Councilmember Jean Godden, other elected officials and industry leaders to urge US Commerce Secretary Gary Locke to intervene and seriously consider use of existing federal facilities in Seattle for NOAA's Marine Operations Center-Pacific homeport in light of the Department of Commerce's Inspector General Report.

The joint letter signed today is the latest effort of a years-long program to retain the marine center in Seattle, where it has made its home for more than 50 years. The Department of Commerce's Inspector General Report concluded that NOAA violated its own rules by not considering existing federal facilities before starting the process that led to choosing Newport, Oregon as their homeport.

"We urge Secretary of Commerce Locke to take a look again at NOAA's process and consider existing federal facilities for the Marine Operations Center-Pacific homeport," said Mayor McGinn. "We believe this action will save taxpayers millions of dollars. I thank Senator Cantwell and Congressman McDermott for their leadership in holding the federal government accountable for this deeply flawed process."

The group gathered at a city park across the Duwamish River from Federal Center South, one of the two existing federal facilities that could house the NOAA fleet. They restated that consolidating NOAA's operations in Seattle at existing federal facilities is the best option for NOAA to achieve its mission and the best deal for federal taxpayers.

"I have long held that it was both bad judgment and bad policy for NOAA to ignore so many critical factors when deciding a location for its Marine Operations Center-Pacific," Rep. McDermott said. "Now both the Government Accountability Office and the Commerce Department's own Inspector General have confirmed what many of us have known for a long time: this process was badly botched from the beginning."

In August, 2009, NOAA announced its decision to move from Seattle, awarding a 20-year lease to the Port of Newport, Ore. That decision was appealed to the Government Accountability Office (GAO) and sustained because NOAA violated its own solicitation rules by proposing a facility in a floodplain. In February, 2010, the City of Seattle originally proposed that the Department of Commerce and NOAA include the Western Regional Center at Sand Point and Federal Center South in their evaluation of potential sites.

"The city's proposal would have saved tens of millions of taxpayer dollars, but fell on deaf ears at the Department of Commerce," said Councilmember Godden. "In light of the Inspector

General's report, we insist on a fair review."

Retaining the marine center in Seattle would preserve approximately 1,450 well paid direct and indirect jobs and \$180 million in economic activity in the area.

"It makes good business sense for the marine center to remain in Seattle," said Admiral John Lockwood, ret., Director, Marketing and Business Development, Todd Pacific Shipyards. "Our community offers freshwater moorage, an experienced and plentiful workforce, proximity to a robust maritime industrial base, and strategic access to NOAA's Western Regional Center at Sandpoint and UW researchers."

There is broad community backing to retain the marine center in Seattle. Neighborhood groups such as Friends of Magnuson Park and the Laurelhurst Community Club are supportive of expanded NOAA operations at Western Regional Center at Sand Point and Federal Center South.

TESTIMONIALS

Dear Roger,

I wanted to take this opportunity to thank you for your relentless efforts, endless patience and selflessness in helping me find the right fit within my personal financial requirements. I appreciate the endless stakeouts in search of the right house to meet my liking. Also, let me say it was very enjoyable working with you and I feel your experience greatly benefited me when it got right down to the bottom line.

Thank you again for your patronage, courtesy and patience.

Sincerely,
Brad Fallon

To all potential home buyers and sellers:

I recommend to anyone buying and/or selling a home to use Steve Laevastu as their agent. Recently, my family needed to buy a larger home. Steve helped us find our perfect home and worked diligently to sell our first home in a soft market. He communicated with us through every step in the buying and selling process, explaining to us all of the complicated real estate terminology.

Working with Steve Laevastu is a pleasure. He is hard working honest and always has time to answer any questions you may have. Above all Steve is a professional, a marketer of homes who will provide you with the most value for your real estate dollar.

Sincerely,
Brian Fry

SOLD HOMES

The following is a list of the homes that sold in our Ravenna Neighborhood over the last month. Do you wonder what your house is worth? The décor, the features and condition all have a bearing on the price a house will command. We have seen the interiors of most of the homes in this list. If you are selling your home, please let us help you. We would be happy to view your home, prepare a market analysis and discuss the details with you. We can provide you with useful information, such as a sales price that might be realistically expected in today's market.

Address	Bed	Bath	Year	Style	Price
7539 23rd Ave NE	3	1	1950	1 Story	\$330,000

THE ITALIAN FESTIVAL
 SEPTEMBER 25-26, 2010
 SEATTLE CENTER HOUSE,

The Italian Festival, inaugurated in 1988, celebrates the joy of "all things Italian" - from opera and popular music to pasta and wine. Food vendors, crafts, puppet theatre, Italian films, a grape-stomping contest and bocce ball tournament honor the "old country" and recognize the remarkable contemporary contributions of this dynamic and artful culture. Presented by Festa Italiana.

Windermere Real Estate / Oak Tree Inc

acteristics of new homes completed in 2009.

It shows a reversal in a trend spanning three decades, when the average size of single-family homes completed in the United States increased continually. Since peaking at 2,521 square feet in 2007, the size was essentially unchanged in 2008, then dropped by almost 100 square feet in 2009.

David Crowe, chief economist for the National Association of Home Builders, attributes the decline to a combination of factors. "We also saw a decline in the size of new homes when the economy lapsed into recession in the early 1980s," he noted, but added, "The decline of the early 1980s turned out to be temporary, but this time but the decline is related to phenomena such as an increased share of first-time home buyers, a desire to keep energy costs down, smaller amounts of equity in existing homes to roll into the next home, tighter credit standards and less focus on the investment component of buying a home. Many of these tendencies are likely to persist and continue affecting the new home market for an extended period."

New single-family homes completed in 2009 had fewer bedrooms than previously, reversing a 20-year trend. The proportion of single-family homes with four bedrooms or more topped out at 39 percent in 2005; it was 34 percent last year. The proportion of single-family homes with three bedrooms increased from 49 percent to 53 percent between 2005 and 2009.

New single-family homes completed last year also had fewer bathrooms than previous years. The proportion of homes with three or more bathrooms was 24 percent last year. That's a decline from the peak of 28 percent in both 2007 and 2008. The percentage of single-family homes with two bathrooms increased from 35 to 37 last year, and the percentage with 2½ bathrooms was at 31 percent for the third consecutive year. The proportion of single-family homes with 1 or 1½ bathrooms has been below 10 percent for more than a decade.

During the past 30 years, the proportion of one-story homes declined steadily, dropping to a low of 43 percent in 2006 and 2007. At the same time, the proportion of single-family homes with two or more stories increased, rising from 23 percent in 1973 to a high of 57 percent in 2006. Split level homes currently account for less than one percent of all single-family homes.

Since 2006 these trends have been reversed, as the share of single-family homes with one-story increased to 47 percent last year, while the share with two or more stories dropped to 53 percent.

The Census Bureau's data on characteristics of completed single-family homes also showed regional differences:

- Air conditioning: In 1973, less than half of all new single-family homes completed had air conditioning; in 2009, 88 percent were air conditioned nationwide. Regionally, the proportion ranged from a low of 69 percent in the West to a high of 99 percent in the South. The Northeast and Midwest were at 75 percent and 90 percent, respectively.
- Garages: Nationwide, 62 percent of new single-family homes completed in 2009 had two-car garages, and 17 percent had garages for three or more cars. However, there were clear regional differences. Three-car garages were found in only about 11 percent of homes in the Northeast and the South. In the Midwest, 30 percent of all homes had three-car garages, and in the West, 26 percent.
- Exterior wall material. Regional differences were especially pronounced in the selection of exterior wall material. Nationwide, 34 percent of all single-family homes completed in 2009 homes had vinyl siding, 23 percent were brick, 19 percent were stucco, and 13 percent had fiber cement siding.

Vinyl siding predominates in the Northeast, where it accounted for 74 percent of the market; wood was a distant second with a 12 percent market share. In the Midwest, vinyl siding accounted for 62 percent of the market while wood and

brick were at 15 percent and 11 percent, respectively.

Brick was the leader in the South, where it was found in 40 percent of new single-family homes. Twenty-eight percent of new homes in the South had vinyl siding and 13 percent had stucco.

The Census Bureau began reporting statistics on fiber cement siding, which is relatively new to the market, in 2005. It already accounts for 24 percent of the market in the West. Stucco and wood account for 52 percent and 15 percent of the market, respectively, in that region.

In commenting on the Census Bureau report, Crowe said the average square footage of new single-family homes completed is only one measure of new home size. "The Census Bureau also reports average square footage in a quarterly release based on starts rather than completions, which is sometimes useful when market conditions are changing rapidly," he said.

The Census Bureau's analysis of the characteristics of new housing is presented in more than 200 tables, available as PDFs or Excel files. The information may be viewed and downloaded at: <http://www.census.gov/const/www/charindex.html#sold>.

SEATTLE LAUNCHES MAJOR OVERHAUL OF CITY'S PLUMBING SYSTEM
Required by federal law, program continues the work of restoring Seattle's waters

SEATTLE -- Seattle has launched one of the most extensive plumbing fixes in its history -- a 15-year, \$500 million public-works project to reduce stormwater and sewage entering local waterways.

The project, required by federal law, continues the vital work of restoring the Seattle's waters. It will also mean rate increases for several years, starting in 2011. "Although the work is mandatory, restoring our waters is important to our quality of life," says Seattle Public Utilities Director Ray Hoffman "In short, we believe it's the right thing to do, because it enables us to better preserve the region's environment and natural resources for future generations."

Both the U.S. Environmental Protection Agency (EPA) and the Washington State Department of Ecology (Ecology) will be monitoring Seattle's progress to make sure it meets water-quality standards under the federal Clean Water Act (CWA).

The city is negotiating a consent decree with EPA and Ecology that in turn will help shape the extent of capital investments - and influence drainage and wastewater rates through 2025.

The work will affect a significant number of residents and businesses, with construction projects planned in about 15 parts of town over the next 15 years. The city is seeking advice and input from various communities, to help select specific options and minimize project impacts.

Regulators are not singling out Seattle. A number of major U.S. cities also face substantial costs as they work to comply with the CWA.

In fact, because Seattle has already made significant progress* in reducing the volume of raw sewage and contaminated stormwater entering our waterways, the cost to finish the job is likely to be much less than what some other jurisdictions are confronting. Additionally, bids from contractors are coming in 20 to 30 percent lower than expected.

Up to 500 jobs** will be supported in the Seattle area over the next five years, as a result of this work.

SPU's Hoffman adds, "With the tough economy, it's a difficult time to launch a

BUMBERSHOOT FESTIVAL
 SEPTEMBER 4-6, 2010
 SEATTLE CENTER

Bumbershoot Seattle is a huge 3-Day Party that celebrates the end of Summer with a really-spectacular showcase of with more than 2500 Artists, displaying their Eclectic and Cultural Masterpieces from all over the world.

8TH ANNUAL RUN FOR CHILDREN'S
 SEPTEMBER 30, 2007 - MAGNUSON PARK
 Taking place on the Sand Point Peninsula overlooking beautiful Lake Washington at Sand Point Magnuson Park, the 8th Annual Run for Children's run & walk is great energizing fun for the entire family. Events include a 5K run and walk, children's dash, awards ceremony, food, fun and prizes. It's a wonderful way to spend the day plus, all proceeds go to benefit the Children's Hospital & Regional Medical Center.
